# EPS30K BALER

## SPECIALITY RANGE

### OVERVIEW

The EPS30K baler is a robust, low maintenance machine that has the ability to reach high compaction ratios with both wet and dry polystyrene.

This machine is very straightforward to use and provides a much simpler and effective way in dealing with polystyrene waste. The operation of this machine allows it to be loaded as the waste is produced.

**Speciality**  
Range

SPECIFICATION	EPS30K
THROUGHPUT (KG PER HOUR)	Up to 30 per hour
OVERALL WIDTH (MM)	2966
OVERALL DEPTH (MM)	595
HOPPER WIDTH (MM)	730
HOPPER DEPTH (MM)	434
LOADING HEIGHT (MM)	1609
OVERALL HEIGHT (MM)	1609
MACHINE WEIGHT (KG)	300
BLOCK SIZE (MM)	150 x 150
BLOCK LENGTH (MM)	Variable
MOTOR (KW)	2.2
POWER REQUIREMENTS	2.2kW / 1 phase / 16amp
