WHEELIE BIN TIPPER & WASHING

SPECIALITY RANGE

OVERVIEW

The Moovmor wheelie bin tip and wash system is designed to tip two 120L wheelie bins at a time or a single 4 wheeled container such as a 1100L wheelie bin.

The bin contents are discharged, then high pressure nozzles automatically wash out the bins before returning them to ground level. This unit is ideal for green waste and food waste bins, units which usually create a foul odour in a short timespace, and helps to keep these wheelie bins smelling fresh at every tip.
